

MyTutor

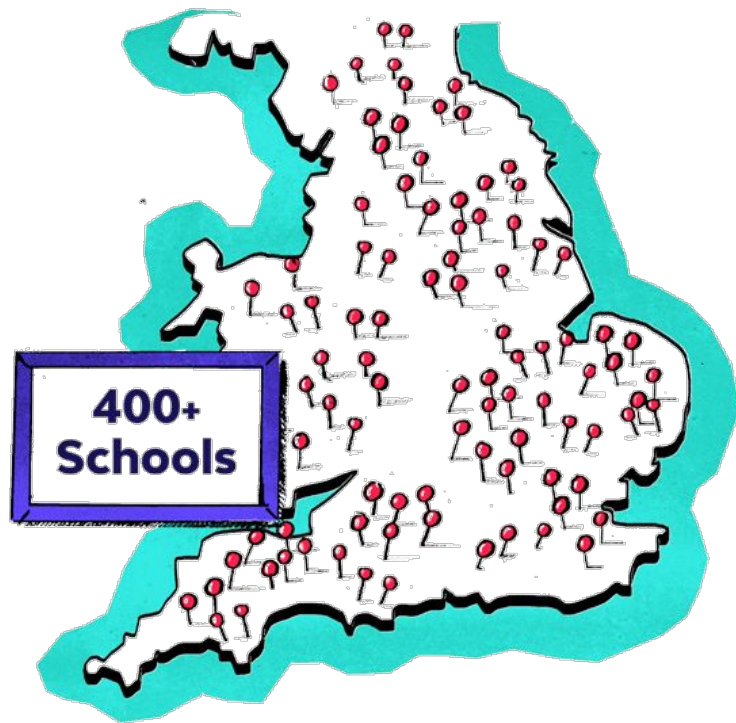

What is MyTutor?

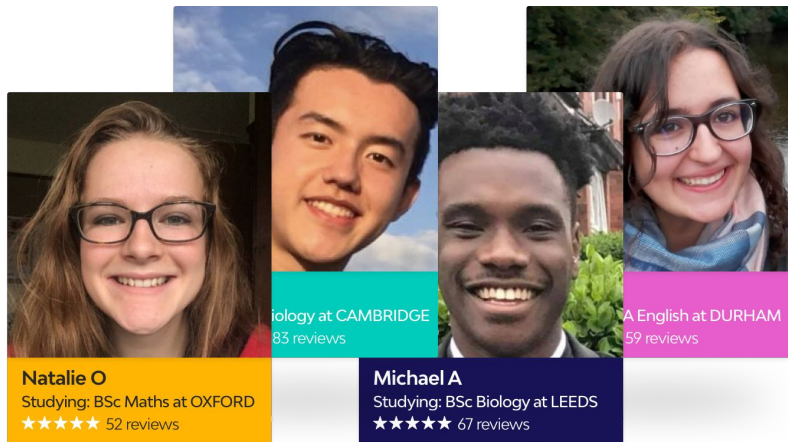

At MyTutor, we match you with a **kind and friendly** tutor to help reinforce classwork, boost confidence and raise grades.

Lessons take place **online** in our interactive lesson space where you'll be able to **see, hear and chat** with your tutor.

We've worked with over **400 schools** across the UK to provide over **11,500 pupils** with tuition.

Who is your tutor?

Our 12,000 tutors are **bright and inspiring role models** who are studying at a university somewhere in the UK.

Your tutor will have recently sat their **GCSEs and A-Levels**, so they understand how stressful exams can be and are on hand to help.

All our tutors are **personally interviewed**, and only **1 in 7** applicants are selected.

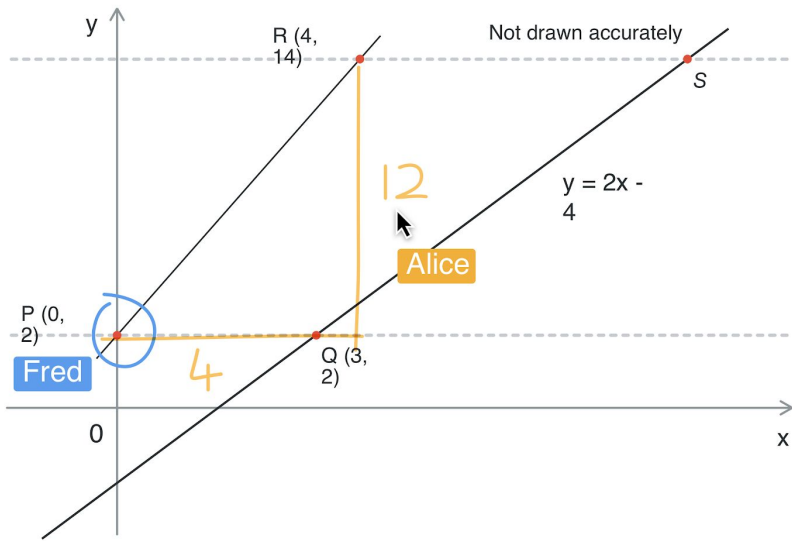

What will your lesson look like?

A Sans 16

The two dashed lines are both parallel to the X axis

Hey, thanks for sending the maths paper

No problem! Lets get started on section 5 🍌

What will happen during your lesson?

Your tutor knows **what topics you're covering in class**, so you can use the lessons to **ask questions** or go over any areas you found particularly tricky.

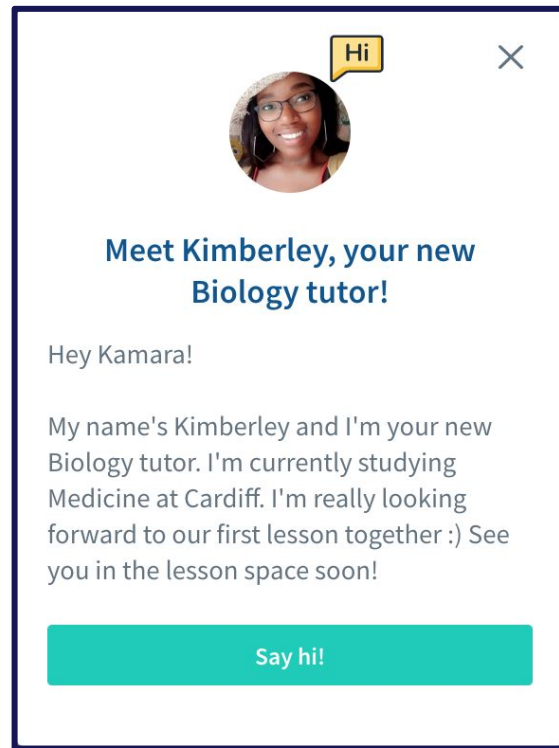

After each lesson, your tutor will **write up a report** so your teacher knows about the great work you've done.

After a term of tuition, you can make a whole grade of progress from your mock result.

Before your lessons get started...

- See a **personalised message** from your tutor on your Pupil Portal
- Click your tutor's name to see their **full profile**
- Have a look at the **upcoming lessons** on your Sessions page

And when your lesson is finished...

- **Download** your work at the end of the lesson
- Don't forget to **rate the tutor and tech**
- Come back and **watch it later** for revision!

Let's get started!

- Google Chrome or Firefox
- www.mytutor.co.uk/schools/login
- Show password
- Run the setup test
- Get in touch with your teacher if you have any problems
